Manage your facility easily with

A Complete Hospital Management System with a Frontend Website

Multi lingual With both
WEB & MOBILE Versions

English | French | Arabic | Chinese | Portuguese | Russian

System Description

This is a Hospital Management System from Remedius Mobile Health & is the Ultimate solution for managing single or multiple hospitals or medical facilities. Every core essential part of a hospital is included in the system. Remedius HMS enables healthcare workers to manage patient's bio data, Record patient vitals, Record laboratory tests and results, Record patient diagnostic information, Record patients' prescriptions and dosage information, Record birth reports and death reports, Manage pharmacy information & drug Inventory. Generate all required reports on an annual or monthly basis. Remedius HMS follows the logical flow of a patient in a conventional health facility. Upon arrival, a patient goes through all the different clinical processes as directed by the health workers. & all details are captured and entered.
